## PROGRAM OBJECTIVES

### Flashed Instruments

Are they sterile or did it just get hot?

Matt Beauchaine

SPS medical

#### **Flashed Instruments: Are They Sterile or Did They Just Get Hot?**

After attending this program, participants will be able to, define flash sterilization, explain common reasons for flashing, describe different types of flash cycles, identify best practices for flashing instruments, discuss how long opened trays remain sterile.

#### **Sterilization Standards:**

Fact or Fiction?

Matt Beauchaine

SPS medical

#### Objectives:

##### **Sterilization Standards: Fact or Fiction**

This interactive program will discuss industry standards for sterilization. Upon participating in this program, attendees will be able to identify appropriate temperature and humidity levels in each area of the sterile processing department, understand AAMI recommendations for personnel, facility design, and quality control, recognize minimum cycle times for flash sterilization in both gravity displacement and dynamic air removal sterilizers,

identify methods for daily efficacy testing of sterilizers, and describe the process for routine product testing.

Third world medical missions and how CSS can help.

Edgar Montanez THOCC NBGH

David Jagrosse Middlesex Hosp.

**Objective:** To give the audience an informative hands on case study of two medical missions carried out by Edgar Montanez and David Jagrosse. Insight will be given into how CSS functions and processes are carried out with limited resources in challenging environments.

#### Objectives:

- Edgar Montanez. Medical mission to Sayaxche Guatamala
- Concept of mission
- Preparation
- The mission
- The reality
- Lessons learned
- What your dept can do to help.
- David Jagrosse. Medical Mission to Riobamba Equador
- Concept of mission
- Preparation
- The mission
- The reality
- Lessons learned
- What your dept can do to help.
